The Low Profile machinery moving dollies are manufactured to the highest specification levels. The 9 (8) ton, 18 (16) ton systems each have a single steerable front unit and an adjustable two point rear set to give a stable three point transportation arrangement.

The weight is distributed evenly over all of the wheels with a fully oscillating front assembly and a non-load bearing axle at the rear. This achieves optimum load sharing and ease of movement by a single person. The modular design of the dollies allows the addition of dolly components for greater carrying capacity.

The steerable unit has multiple wheels with low rolling resistance. These can be non-marking, super tough, impact resistant poly wheels or steel wheels, each with special anti-friction bearings.

Each two point rear dolly set also has multiple wheels of the same design, and in addition, has an adjustable axle which helps prevent misalignment of the dollies.
MODEL LP9, 9 (8) TON LOW PROFILE DOLLIES:
STEERABLE FRONT UNIT:
Maximum Load .................................. 9,000 lbs. (4082 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Turntable ........................................... 6" (152 mm dia)
Overall Height ..................................... 3-7/8" (99 mm)
Handle Length ...................................... 51-3/4" (1314 mm)
Assembled Weight Incl. Handle ................. 84 lbs. (38 KGs)
Heaviest Item ....................................... 37 lbs. (17 KGs)

ADJUSTABLE REAR SYSTEM:
Maximum Load .................................. 9,000 lbs. (4082 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Load Area (28) .................................... 5" x 7" (127 mm x 178 mm)
Width Adjustment ................................. 20" - 60" (508 - 1524 mm)
Overall Height ................................... 3-13/16" (97 mm)
Assembled Weight .................................. 62 lbs. (28 KGs)
Heaviest Item ...................................... 25 lbs. (12 KGs)

MODEL LP18, 18 (16) TON LOW PROFILE DOLLIES:
STEERABLE FRONT UNIT:
Maximum Load .................................. 17,636 lbs. (8000 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Turntable ........................................... 6" (152 mm dia)
Overall Height ................................... 3-7/8" (99 mm)
Handle Length ..................................... 51-3/4" (1314 mm)
Assembled Weight Incl. Handle ................. 84 lbs. (38 KGs)
Heaviest Item ....................................... 37 lbs. (17 KGs)

ADJUSTABLE REAR SYSTEM:
Maximum Load .................................. 17,636 lbs. (8000 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Load Area (28) .................................... 9" x 7" (228 mm x 178 mm)
Width Adjustment ................................. 20" - 60" (508 - 1524 mm)
Overall Height ................................... 3-13/16" (97 mm)
Assembled Weight .................................. 62 lbs. (28 KGs)
Heaviest Item ...................................... 26 lbs. (12 KGs)

MODEL LP28, 28 (25) TON LOW PROFILE DOLLIES:
STEERABLE FRONT UNIT:
Maximum Load .................................. 27,557 lbs. (12500 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Turntable ........................................... 7" (178 mm dia)
Overall Height ................................... 4-13/16" (123 mm)
Handle Length ..................................... 66-1/4" (1683 mm)
Assembled Weight Incl. Handle ................. 132 lbs. (60 KGs)
Heaviest Item ....................................... 53 lbs. (24 KGs)

ADJUSTABLE REAR SYSTEM:
Maximum Load .................................. 27,557 lbs. (12500 KGs)
Wheels .............................................. 3-1/4" dia. x 1-7/8" (82 mm dia. x 49 mm)
Load Area (28) .................................... 9" x 13" (228 mm x 330 mm)
Width Adjustment ................................. 20" - 60" (508 - 1524 mm)
Overall Height ................................... 3-7/8" (99 mm)
Assembled Weight .................................. 93 lbs. (42 KGs)
Heaviest Item ...................................... 40 lbs. (18 KGs)
