

RECERTIFICATION PROGRAM MOBILE EQUIPMENT

MOBILE EQUIPMENT INSPECTIONS AND ACTIONS

- Visual inspection of all welds
- Visual inspection for any physical damage to the machine
- Visual inspection of cylinders for external leaks and meter tested for internal leakage
- Counterbalance valves, safety valves, and relief valves are pulled, cleaned, inspected, and reset to factory specifications
- Visual inspection of all hydraulic lines and connections while under pressure
- Hydraulic oil sample is drawn and sent to an independent laboratory for testing and analysis
- Check drive system pressure, drive speed in forward and reverse, and drive chain tension (if applicable)
- Inspect wire rope, sheaves, and hook block for wear and damage (if applicable)
- Inspect tires for wear and damage
- Lubricate all bearings and slider pads
- Change all hydraulic oil filters
- Change engine oil and filters
- Coolant tested
- Change spark plugs (if applicable)
- Certified Load Test completed

Upon successful completion of the program, the mobile equipment owner will receive an Official Recertification Letter and Testing Certification Document
